RE: 1064 Mission – Modular Setting Delay - Night Noise Construction Update

Dear 1064 Mission Neighbor –

Although you received a letter stating that the night construction for the modular unit setting would begin this Sunday, March 28, 2021, we have experienced a delay and will not be starting on that date. Our team will provide another notification closer to the revised start date and include updated information on the modular setting at the 1064 Mission Street construction site. Thank you for your understanding and we apologize for any inconvenience or confusion this may cause.

We encourage you to contact Pati Boyle at (415) 722-3584 or patiboyle@comcast.net to discuss your questions or concerns. We want to do what we can to mitigate the impact of this night noise on you and your household as much as possible. Please do not hesitate to reach out to Pati to discuss.

We will continue to keep neighbors informed of the schedule for modular setting on the Updates page of the development website at www.1064MissionStreet.org.

Sincerely,

Mercy Housing California and Episcopal Community Services of San Francisco
